

Danny Farin Bio

Danny Farin is an enthusiastic, target driven executive and entrepreneur with proven accomplishments in the healthcare industry. Mr. Farin Founded 3 companies and lead two of them as a CEO towards market commercialization, strategic collaborations, and successful exits.

He is experienced in managing complex, multi-disciplinary technological companies, and delivers on planning and execution of long-term business strategies in fluctuated environments.

Danny is the cofounder and the chairman of CVAid Medical, which develops and commercializes an AI based, innovative stroke triage, orchestration and monitoring software solutions, using standard smartphones to improve clinical outcome.

In parallel, Mr. Farin is the cofounder and CEO of Perflow Medical, which develops and commercializes innovative products for various Neuro-Vascular indications, like ischemic stroke, intra-cerebral aneurysms, vasospasm, AVM's etc.

Perflow was recently acquired by a Chinese Private Equity Fund in a successful full Buy-out deal and consequently accelerated its strategy towards global expansion.

Prior to Perflow, Mr. Farin was the Co-founder and CEO of Eon Surgical, which developed and commercialized an innovative platform for scar-less laparoscopy procedures. Eon Surgical was acquired by Teleflex Medical (Nasdaq: TFX) in 2013.

Previously, Mr. Farin was COO and Project Management Director at Sunrise Projects, a boutique consultancy firm for technological companies.

Mr. Farin holds an MBA, majoring in Finance and Strategy from the Tel-Aviv University, Israel and a B.Sc. in Biotechnology Engineering (cum laude) from Ben-Gurion University in the Negev, Israel.
